

**Patio roofs from Griesser.
Plaza**

Plaza Home – The graceful textile patio roof for your home.

Plaza Home

Plaza Home guarantees you the best protection from the sun, wind and rain. Because the weather shelter can be designed with a larger incline than an awning, rainwater runs off in a controlled manner from an incline of 14 degrees. The textile weather shelters enable a particularly large projection, regardless of the system width. Why? Because the pillars ensure high stability and wind resistance. When enjoying good weather, you can use your weather shelter as a solar shading system.

Option

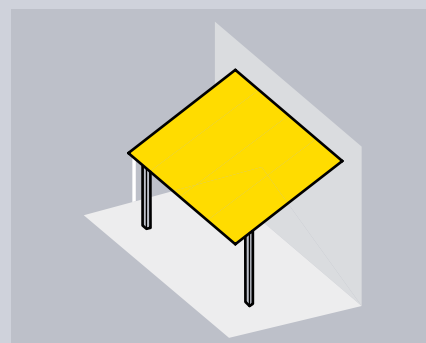

- 2-panel systems
- Wall connection roof

Fabric collection for Plaza Home

- Polyester materials from the Collection WeiTex

Plaza Home dimensions

Min. width	1600 mm
Max. width	6000 mm
Min. depth	1500 mm
Max. depth	4000 mm

Plaza Home

Plaza Pro – The textile patio roof with a multitude of options.

Plaza Pro

As well as featuring the tried-and-tested characteristics of the Plaza Home system, the Plaza Pro system offers even more options. Plaza Pro features an overhang with uniform hip and can be ideally combined with the VertiTEx vertical awning – tailored exactly to your needs.

Options

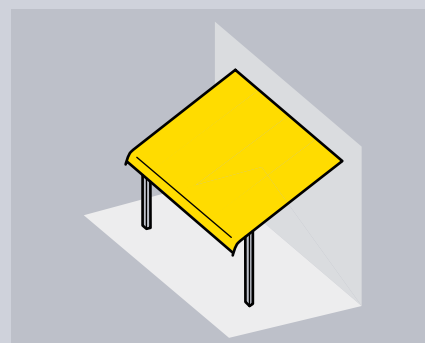

- VertiTEx vertical awning
- Paravento side screen
- Multi-section units
- Wall offset
- Lateral glass panels
- Wall connection roof

Fabric collection for Plaza Pro

– Polyester materials from the Collection WeiTex

Plaza Pro dimensions

Min. width	1500 mm
Max. width	5000 mm

Options

VertiTex vertical awning

With VertiTex, the vertical privacy and solar shading system, you can lend your seating area an air of undisturbed tranquility.

Fabric collections for VertiTex

- Gauzes from the Collections Soltis 86 and Soltis 92
- Acrylic materials from the Collection Moments (9 designs to choose from)

VertiTex dimensions

Min. width	600 mm
Max. width	6000 mm
Min. height	500 mm
Max. height	2400 mm

Lux Design light bar

Plaza is available as an option with integrated lighting in the light strip. The economical low volt technology provides an all-year-round lighting system. Because the spotlights can be angled individually, they can create a pleasant atmosphere when viewed from both the outside and indoors.

Paravento side screen

If you want complete privacy or protection from unwanted sunlight, simply slide out the lateral Paravento privacy and solar shading panel.

Fabric collections for Paravento

- Acrylic materials from the Collection Moments
- Gauzes from the Collections Soltis 86 and Soltis 92

Paravento dimensions

Max. extension length	4000 mm
Min. height	800 mm
Max. height	2500 mm
Max. surface area	8 m ²

VertiTex vertical awning

Paravento side screen

WeiTex polyester fabric collection – quality fabrics for professionals.

Collection WeiTex

The high-tech polyester fabrics are particularly suited to textile terrace shelters with heavy loading, as they are permanently resilient yet feature an attractive material appeal. By and large the elastic fabric returns back to its original state after heavy loading (memory effect). The formation of creases is also considerably reduced. All materials in the WeiTex Collection, developed in collaboration with the traditional Italian cloth manufacturer Parà, use the latest nanotechnology to produce dirt- and water-repellent characteristics.

Controls

Connecting your awning to a control system guarantees you maximum convenience.

Griesser Remoto®

With the radio-controlled Griesser Remoto® hand-held transmitter, you can operate your awning from the comfort of your deck chair. There's a good reason why quality comes automatically to Griesser blinds and rolling shutters.

Design description

Plaza Pro/Home

Textile patio roof. Profiles made from extruded aluminum. Roof incline ranges between 5 and 45 degrees (rainwater runs off in a controlled manner from 14 degrees).

VertiTex and Paravento

Front bar and box profile (one-part system) made from extruded aluminum.

Colors

Basic

Aluminum (RAL 9006/VSR 140) or white (RAL 9016).

The GriColors range includes 100 color shades in four collections, Glass & Stone, Sun & Fire, Water & Moss and Earth & Wood – from cool white and sunny red to natural blue and earthy brown.

Fabric collection

WeiTex Collection

Fabrics are 100% polyester, spinneret dyed, with a high degree of light fastness and durability, nano-based impregnation making the fabric dirt-repellent and water-repellent, tested for harmful substances in accordance with Öko-Tex standard 100. Web width 1200 mm. Weight of material approx. 360 g/m².

Planning tips and operating instructions

- The solar shading systems should be retracted if it is windy.
- The systems must not be operated if there is a risk of ice.
- The systems must be accessible for maintenance work.
- Observe the VSR data sheets or information in EN 13561 wind classes.
